

**Threat Existence to Limestone Formations Around Goa Peteng in South Bali Island,
Indonesia**

Research Data Collection Instrument

No	Variable	Indicator	Data Sources
1.	Limestone Formations Conditions	1.1 Geology	Center for Geological Research and Development, 1998
		1.2 Rainfall	Kurniawan, 2020
		1.3 Soil type	Kurniawan, 2020
		1.4 Landcover	Google Earth and Field Observation
		1.5 Mesokarst & Non-karst	Field Observation
		1.6 Social Culture	Field Observation and Interview
2.	Limestone Formations Threat	2.1 Landuse changes	Google Earth
		2.2 The presence of rubbish and waste	Field Observation
3.	Opportunities and Protection of Limestone Formations	3.1 Utilization by existing communities	Interview
		3.2 Potential for educational tourism	Field Observation
		3.3 Potential Karst Landscape Area (KBAK)	Field Observation
